

### A Baby's Birth

is very much like the blossoming of a flower. Its beauty and perfection depends entirely upon the care bestowed upon its parent. Expectant mothers should have the tenderest care. They should be spared all worry and anxiety. They should eat plenty of good nourishing food and take gentle exercises. This will go a long way toward preserving their health and their beauty as well as that of the little one to come. But to be absolutely sure of a short and painless labor they should use

### Mother's Friend

regularly during the months of gestation. This is a simple liniment, which is to be applied externally. It gives strength and vigor to the muscles and prevents all of the discomforts of pregnancy, which women used to think were absolutely necessary. When Mother's Friend is used there is no danger whatever. Get Mother's Friend at the drug store, \$1 per bottle.

## WILL BE READY FOR WORK SOON

Dredge Caucus Has Capacity for Removing 800 Cubic Yards in 45 Minutes and is Expected to Accomplish Good Work.

The fine new dredge Caucus, which reached port Friday from New York, in command of Captain Frank M. Dunn, will be ready to commence work in a short time. In fact as soon as the big suction pipes are attached, which will require ten or twelve days, she will be ready to go on the bar and commence removing sand and deepening the channel.

Captain Dunn, who is the commanding officer of the vessel, is well acquainted with the needs of the harbor, and as a consequence excellent work will be accomplished. As a pilot it was necessary for him to be acquainted with the depth at all places, and now that he is in command of the dredge this knowledge will be useful. In selecting him as commanding officer the engineering department made a wise move.

The dredge, built especially for this port, is 200 feet long, 40 feet beam, 1,000 tons gross and 800 tons net. She has capacity to fill her bins with 800 cubic yards of sand within 35 or 45 minutes, which is exceptionally fast work.

The fittings of the vessel are almost

the same as those of the best passenger steamers, the officers and crew having neat and comfortable quarters. She is equipped throughout with bells, hot and cold water baths, and every convenience. She is an excellent sea boat, and during the voyage from New York to Pensacola behaved excellently although the weather out from Sandy Hook was anything but calm. She made a speed, including stops at Charleston and other points of about 10.63 knots. Counting all stops it required ten days and eleven hours, but not including stops she made the run in seven days and six hours.

The Officers.

The Caucus will have a crew of thirty-five men, including officers. The latter are as follows:  
F. M. Dunn, Master.  
F. M. Hatch, Inspector.  
M. A. Chambers, First Engineer.  
T. Jones, Second Engineer.  
John N. Jameson, First Mate.  
C. P. Posey, Second Mate.  
Sam Crittan, Quartermaster.  
John N. Rauscher, Quartermaster.  
W. J. Roberts, Oiler.  
Chas. L. Simpson, Oiler.  
Joe Stockard, Oiler.

### Men and Heads.

"What kind of head do you like on a man?" was asked of the president of a corporation employing several thousand hands. He replied: "It depends altogether on what I want the head to do. Each department of our business requires a different shape of head. We don't look for veneration, benevolence, generosity, sublimity, conscientiousness, acquisitiveness or idealism. Take them all in all, I think I'd rather have around me men of combativeness, aggressiveness, hope, spirit, constructiveness. I try to pick out such. I should like every man in my employ to have at least two-thirds of his head in front of his ears. Men with big back heads are overweighted with intellect; too slow to keep up with the age."—New York Press.

### Belgium as a Lace Center.

Belgium has long been an important center of the lace industry.

The art of making lace spread through Flanders from France and Italy in the middle centuries owing to the splendid qualities of Belgian flax, and it was there that the wonderful duchesse lace was originated. Much of the so-called Spanish lace—black, with its large roses and trailing design—was also made in Flanders, and for the last hundred years the cities of Bruges, Ghent and Ypres have put on the market the three best grades of the modern valenciennes lace, each city having a distinct variation in design due to the differences in workmanship gradually introduced in the course of years in the three localities.

### He Won Easily.

Mr. Subbubs—You know you're only talking nonsense. What do you want a couple of new gowns for? Mrs. Subbubs—Why, Mrs. Playne has got a dozen gowns, all of them much handsomer than the two or three that I've got. Mr. Subbubs—Yes, I know. But a homely woman like that needs rich attire in order to attract attention from her face. You don't—Liverpool Mercury.

### Indignation.

"Say, boss," began the beggar, "I'm outer work an'—"  
"See here," interrupted Goodart, "I gave you 50 cents last week."  
"Well, yer've earned more since, ain't yer?"—Exchange.

### Not His Privilege.

Employer (to presumptuous clerk)—Are you the boss here, I'd like to know? Clerk—No, sir, but—Employer—Well, don't talk like a fool then.—Boston Commercial Bulletin.

As every climate has its peculiar disease, so every walk in life has its peculiar temptations.—Macaulay.

## The following is extracted from the Frick Report Indicating the Superiority of the Annual Dividend Company:

"The Equitable, in common with several others of the larger companies issues the greater portion of its policies on the deferred distribution period plan. . . . When annual dividends are paid the policy holder has an immediate and yearly recurring check upon the operations of his Company. . . . On the other hand the holder of a twenty year distribution policy has no knowledge whatever concerning the earnings of his policy until the expiration of the twenty years. . . . He entertains hopes for nineteen years, and, if dissatisfied with the realization at the end of twenty years, it is futile for him to protest. The incident is closed. . . . The annual dividend Company is held to accountability every year. The deferred dividend Company is never held to accountability by the whole body of its policy holders; and is so held by its individual policy holders only when their opportunity for action has passed."

### A Summer Coat in Silk

The more fitted lines that have recently been introduced in those thin coats that are intended to fill in as extra wraps during the warm weather, are capable of far more dressy development than were the extremely loose ones that prevailed for so long. The smart one pictured is constructed in two parts, bodice and skirt; and the two are joined invisibly in the many rows of shirring that appear at and above the waist line. There is a round lace collar simulating a yoke over the shoulders, and to this the coat is shirred back and front, the fullness drawn down snugly to the waist. The coat skirts, too, are full,

the model intended to reach as far as the band of the knee. There is a pointed cape effect over the shoulder, set into the armhole, this falling well below the waist line back and front, where it ends in a tassel. Ribbon embroideries appear on this, in the form of worked passion flowers, and a bouillonne band of the silk is festooned all around the hem of the coat skirt.

Three spectres that threaten baby's life. Cholera infantum, dysentery, diarrhoea. Dr. Fowler's Extract of Wild Strawberry never fails to conquer them.
